Journal of Contaminant Hydrology, 13 (1992) 419–420
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 13, 1993

Special Issue "Chemistry and Migration of Actinides and Fission Products", by J.I. Kim and G. de Marsily (Editors)

Preface, by J.I. Kim vii

Introduction, by G. de Marsily ix

(A) Modelling

Reconstructed porous media and their application to fluid flow and solute transport
J. Sallès, J.F. Thovert and P.M. Adler 3
An overview of uncertainties in modelling groundwater solute transport
J. Carrera 23
Flow and nuclide transport in fractured media: The importance of the flow-wetted surface for radionuclide migration
L. Moreno and I. Neretnieks 49
An experimental study of flow and transport in fractured slate
K.A. Cliffe, D. Gilling, N.L. Jefferies and T.R. Lineham 73
Modeling mineral dissolution and precipitation in dual-porosity fracture–matrix systems
C.F. Novak 91
Coupling geochemistry with a particle tracking transport model
R. Fabriol, J-P. Sauty and G. Ouzounian 117
The influence of heterogeneous rock chemistry on the sorption of radionuclides in flowing groundwater
A.T. Emrén 131
Colloid-facilitated transport of radionuclides through fractured media
P.A. Smith and C. Degueldre 143
The impact of colloids on the migration and dispersal of radionuclides within fractured rock
P. Grindrod 167
A model for the behaviour of ^{137}Cs in watershed scenarios
A. García-Olivares and A. Agüero 183

(B) Data Base

Migration of strontium in clayey and calcareous sandy soil: Precipitation and ion exchange
F. Lefèvre, M. Sardin and D. Schweich 215
The formation of solid solutions in surface layers: An important adsorption mechanism?
B.S. Jensen 231
Assessment of radionuclide retardation: uses and abuses of natural analogue studies
I.G. McKinley and W.R. Alexander 249
Response to McKinley and Alexander (1993)
R.E. Jackson 261
Response to McKinley and Alexander (1993)
M. Ivanovich 263
Response to McKinley and Alexander (1993)
O. Landström and E-L. Tullborg. 267
Response to McKinley and Alexander (1993)
L.H. Brush 269

Comments on responses to our paper "Assessment of radionuclide retardation: Uses and abuses of natural analogues"
I.G. McKinley and W.R. Alexander 271
Uranium migration through intact sandstone cores
D. Read, T.A. Lawless, R.J. Sims and K.R. Butter 277
The migration of uranium into peat-rich soils at Broubster, Caithness, Scotland, U.K.
D. Read, D.G. Bennett, P.J. Hooker, M. Ivanovich, G. Longworth, A.E. Milodowski and D.J. Noy 291
Trace-metal behaviour in natural granitic waters
G. Alaux-Negrel, C. Beaucaire, G. Michard, P. Toulhoat and G. Ouzounian 309
The selection of a sorption data base for the geosphere model in the Canadian Nuclear Fuel Waste Management Program
T.T. Vandergraaf, K.V. Ticknor, T.W. Melnyk 327
A comparison of radionuclide sorption databases used in recent performance assessments
I.G. McKinley and A. Scholtis. 347
Modelling reactions between cement pore fluids and rock: implications for porosity change
D. Savage and C.A. Rochelle 365
A study of the effects of an alkaline plume from a cementitious repository on geological materials
M.C. Braney, A. Haworth, N.L. Jefferies and A.C. Smith 379
Study of porosity and migration pathways in crystalline rock by impregnation with ^{14}C-polymethylmethacrylate
K.H. Hellmuth, M. Siitari-Kauppi and A. Lindberg 403
